

# Truist Corporate Card Reconciliation Process

## Purpose

To document and reconcile all credit card charges on individual accounts on a monthly basis.

## Process

Navigate to the Truist Enterprise Spend Platform (ESP) website in your web browser.

You will be prompted to enter your email address, user ID and password. These items were first provided when the cardholder went through the initial training. If you cannot remember any of these items, please email Accounts Payable for assistance.

Once logged in, click on the “Expenses” tab. Clicking on this link will bring you to a window with the list of current transactions for the monthly statement made on your card. These are the transactions you will need to reconcile on a monthly basis in order to provide the Business Office with the necessary information to have these properly entered into Trinity’s accounting software.

Expenses			
Show My expenses	Filters 1 filters set	Find	
Aicpa *order	484.00 USD	ST - MasterCard	08/12/2020

Reconciling transactions entails two parts:

1. Assigning the general ledger code to each transaction, similar to what is entered on a Purchase Order or Check Request. The system should be set up to default to your department code when you go to reconcile.
2. Uploading receipts and other supporting documentation for each transaction that was approved and valid.

To begin the process of reconciling, click on the line for the transaction to be reconciled. This will open the “transaction details” window.

Options

You will select your default department code from the dropdown list. For most cardholders there will only be one department number to choose from, but please note that if you directly oversee the budgets of multiple departments there will be more than one to choose from. Make sure the department code you are selecting corresponds to the actual transaction.

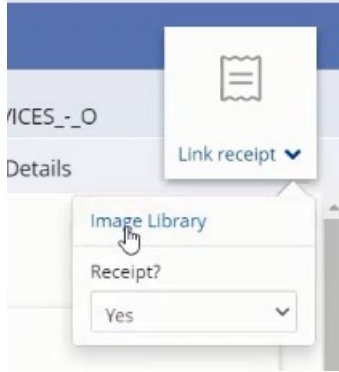

The next item you will need to select is the expense code (e.g. Office Supplies, Software, Travel, etc.), directly below the department selection. Click the [Search] option to open the list of expense codes. You will arrive at this screen.

The screenshot shows a mobile application window titled "Search codes". At the top, there is a blue header with a close button (an 'x' icon) and the text "Search codes". Below the header, the main content area is titled "Expense". It contains a search form with the following elements: a "Code value" input field with a dashed border, a "Description" input field, a "Show valid codes only" toggle switch which is currently turned on (indicated by a green checkmark), and a "Search" button. Below the search form, there is a list of expense codes, each with a code number and a description: 70320 Software, 70330 Hardware, 70340 Furniture, 70350 Office Equipment, and 70360 Prof Mgmt Fees. The list is scrollable, as indicated by a vertical scrollbar on the right side.

You can scroll through and find the expense code that corresponds most directly with the transaction, or you may type in the code or description if it is known. Click on the appropriate code and choose “select” to link it to the transaction.

Once you have completed the expense code piece, you have finished with the first part of reconciling the transaction, the general ledger code assignment. You are now ready to begin the second and last part, uploading the receipt image. This will document the validity of the expenditure and provide the Business Office with the necessary documentation should this item be questioned as part of our annual audit. **It is of the UTMOST IMPORTANCE that every item reconciled each month be supported with a copy of a receipt, including refunds.** Failure to continuously provide proper documentation in this regard can lead to forfeiture of the individual’s corporate card.

To upload the receipt, select the paper icon in the top right corner of the “transaction details” window. Select “yes” in the “receipt?” dropdown, then click on “image library”.

You are now at the Receipt Upload screen with four different methods of uploading these items:

1. Upload – Directly uploaded from your hard drive (recommended)
2. Upload via mobile app – Images uploaded via mobile app will show under “image library” instead of “linked images” if they have not been assigned to a transaction.
3. Upload via Email – NOTE: This is not your trinity email address, but rather a separate email housed by Truist that you can send images to and will ultimately arrive directly on the Truist website. For more information about this option, please contact Accounts Payable.
4. Upload via Fax – Not recommended.

Depending on the method you select, you will upload your documentation accordingly and exit out of the screen. You can now navigate back to the Transactions Details window and will notice that an image of your receipt is shown where the paper icon previously was.

At this point, you may include a description of the purchase and any application purchase order number in the “notes” field. Once all information has been added, you can click “complete” and the transaction will be completely reconciled. Once you have done this for every transaction available for the month, you have successfully completed the reconciliation process.

If you have any questions regarding anything in this process manual, please feel free to contact the Controller. We thank you for your work to ensure that this process runs as smoothly as possible each month.
